

Ex 2: Setting Up a Zoho Creator Account and Exploring the Platform Architecture and Interface

Name : Priyan S

Roll no : 240701402

1. Aim :

To register a Zoho Creator account and understand the basic features of the platform. To create a simple application and learn how forms, reports, and dashboards work together.

2. Creating a Zoho Creator Account

Step 1: Account Registration

- Visit the Zoho Creator website.
- Register using a valid email address.
- Verify the account through email.
- Log in and access the Zoho Creator workspace.

Screenshot 1: Zoho Creator Home Page

Step 2: Developing a Sample Application

Create an application named **Student Management System** (or **Employee Information System**, **Library Management System**).

The application contains:

- Student Information Form
- Student Records Report
- Dashboard

The form stores:

- Student
- Student Name
- ID
- Department
- Year
- Mobile Number
- Email Address

Screenshot 2: Create New Application and gform

The screenshot displays the 'student app' interface in 'Development' mode. The left sidebar shows a navigation menu with 'gform' and 'gform Report'. The main area is titled 'gform' and contains a form with the following fields:

- Name:** Split into 'First Name' and 'Last Name' input boxes.
- Email:** A single input box.
- Number:** An input box with a placeholder '#####'.
- Address:** Split into 'Address Line 1' and 'Address Line 2' input boxes.
- City / District:** An input box.
- State / Province:** A dropdown menu with '-Select-' as the current selection.
- Postal Code:** An input box.
- Country:** A dropdown menu with 'India' as the current selection.
- Phone:** An input box with a placeholder '+91 81234 56789'.

A 'Submit' button is located at the bottom right of the form. The top of the interface shows a status bar with 'student app', 'Development', 'View as -MySelf-', 'Trial expires in 4 days', 'Upgrade', 'Edit this application', and 'Help'.

Dashboard

The application dashboard/home page displays all created applications and provides options to edit or create new applications.

Screenshot 4: Dashboard

3. Application Modules

Student Information Form

- Used to collect student details.
- Validates user input before saving.
- Automatically stores records in the database.

Student Records Report

- Displays all submitted records.
- Allows searching and filtering.
- Supports editing and deleting records.

Dashboard

- Displays application summary.
- Provides quick navigation to forms and reports.
- Shows recently added records.
-

4. Platform Architecture

1. Forms - Capture user information.
2. Data Storage - Securely stores submitted data.
3. Reports - Display and manage records.
4. Workflows - Automate actions like notifications and approvals.
5. Pages - Create customized dashboards.
6. User Management - Controls user roles and permissions.
7. Integration - Connects with other Zoho applications.

5. Interface Components

- Home Dashboard
- Application Explorer
- Form Builder
- Report Builder
- Workflow Section
- Navigation Panel
- Search Feature
- Settings Menu
- User Profile

- Mobile Application Preview

6. Result

Successfully created a Zoho Creator account, built a sample application, explored different platform components, and gained practical knowledge of forms, reports, dashboards, workflows, and the overall Zoho Creator environment.

These points are different from your PDF, while still matching the same experiment format, so they are suitable for your record without being copied directly.
